CLIENT CASE STUDY

Nerito

Payroll Disbursement & Financial Operations Platform

A secure, scalable digital platform for business payroll and financial operations.

Industry
Financial Services (FinTech)

Solution
Payroll & Financial Operations Platform

Client Location
Spain

Business Context

Nerito is a Spanish financial technology platform designed to digitise and streamline business payroll management and related financial operations, enabling organisations to manage employee payroll, tax information and settlement details through a unified and secure web platform.

Key Objectives

- Digitise and streamline organisational payroll operations
- Manage tax and financial settlement details efficiently
- Provide a secure, reliable and scalable platform for business users

AI Enablement – In Progress

Expanding Nerito with Agentic AI to automate payroll workflows, assist with compliance and deliver intelligent operations for greater efficiency and accuracy.

SOLUTION OVERVIEW

Digitising Payroll & Financial Operations

A unified digital platform that simplifies payroll management, financial processing and employee disbursements for businesses.

End-to-End Payroll Workflow

Organisation Setup
Company, payroll profiles and policies

→

Employee Management
Employee data, roles and payroll details

→

Payroll Processing
Calculate, review and approve payroll

→

Disbursement & Settlement
Salary payout and financial reconciliation

→

Reporting & Compliance
Payroll reports, tax information and audit records

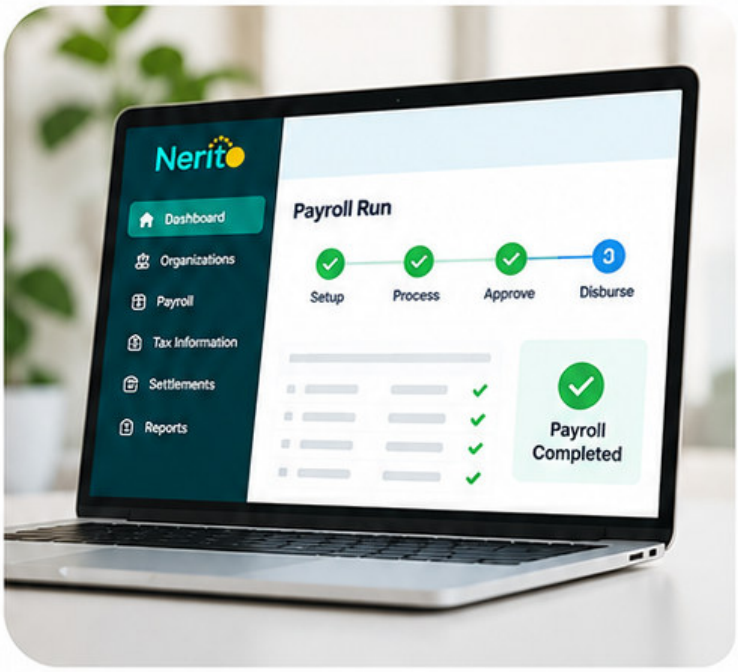
Key Capabilities Delivered

Organisational & Payroll Setup
Company profiles, payroll configuration and employee onboarding

Financial & Tax Management
Tax information, statutory details and settlement records

Payroll Processing & Disbursement
End-to-end payroll run and salary distribution workflows

Secure Access & Administration
Role-based access, approvals and operational controls



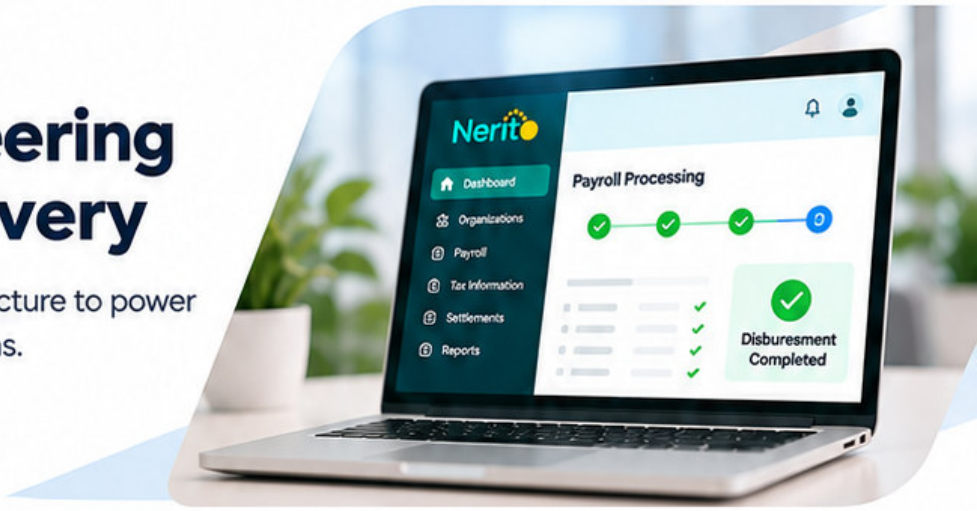
Agentic AI – Next Phase

Enhancing payroll and financial operations with AI agents to automate data preparation, validation, compliance checks and exception handling.

SOLUTION ENGINEERING

Platform Engineering & Technical Delivery

A modern, secure and scalable architecture to power Nerito's payroll and financial operations.



Technology Stack

Built with a modern, cloud-native and API-first technology stack.

- **React** (Web App)
- **Node.js** (Backend Services)
